## Known Issues

### All

- (1) **Issue:** If the scanner is opened during copying or scanning, the current scan job may be canceled.
- (2) **Warning:** When upgrading the drivers from the ones included with Product Library v1.3 or older, you need to uninstall the previous driver version before installing the one included on this CD.
- (3) **Issue:** During USB installation on Win9x, "USB Connection" does not go away.  
**Solution:** If USB installation does not proceed automatically and the "USB Connection" dialog box remains open, disconnect and reconnect USB cable to regenerate PnP event and installation process.
- (4) **Issue:** Upgrading from old version (Version 1.4 or later) of the Product Library results in two drivers being installed.  
**Solution:** Uninstall the old version of both the scanner driver and the printer driver before installing the new version.

### Print

- (1) **Issue:** In Microsoft PowerPoint, colored text may be printed as black.  
**Solution:** Change the "Color/Grayscale" setting in PowerPoint from "Grayscale" to "Color".
- (2) **Issue:** In Microsoft Word, border lines may be printed in a different style than specified.
- (3) **Issue:** In Microsoft Excel, when you print a line chart, the foreground color may not be printed.
- (4) **Issue:** When printing PDF files from Adobe Acrobat Reader using reduce or enlarge scaling settings, they may not be applied properly.  
**Solution:** Adjust the "Page Scaling" setting of Acrobat Reader.

### Scan

- (1) **Issue:** After changing the printer name, using the "Copy Function" may not work properly.  
**Solution:** Change the printer name back to "Kyocera FS-1016MFP / FS-1116MFP".

- (2) **Issue:** In Acrobat 6.0, scanning using the minimum area setting may not work properly.
- (3) **Issue:** When scanning a black and white image, it may be scanned smaller in width.
- (4) **Issue:** If the scanner driver was installed through a network connection using Virtual Link, the installer may not be able to upgrade the scanner driver.  
**Solution:** To upgrade scanner driver, use the USB connection; or uninstall and reinstall the scanner driver and the printer driver.
- (5) **Issue:** When scanning something smaller than A4/letter size, the preview image may not show correctly.
- (6) **Issue:** During upgrading of the Scanner driver, QLink pops up and remains open.  
**Solution:** Close it manually.
- (7) **Issue:** The gamma curve value of TWAIN may not be correct.  
**Solution:** Click the Reset button.
